mezzanine

Brand Guidelines

A complete reference for consistent brand expression.

Brand story

A mezzanine is the in-between floor. Not ground level, not the upper deck. It's the elevated vantage point in a theater where you see both the stage and the crowd. In finance, it's the middle layer that connects debt and equity.

The Mezzanine is a social media agency that occupies that same strategic middle ground — between a brand and its audience, between culture and commerce, between data and creative instinct. We see what others miss because we operate from a vantage point most agencies don't even know exists.

The visual identity reflects this positioning: structural, elevated, precise. The logo is built on the letter "m" framed as an architectural cross-section, with a single accent line marking the mezzanine level — the layer where we do our best work.

The view from above.

We are the layer between a brand and its audience.
The elevated perspective that changes the strategy.

Logo system

The logo exists in four configurations. Use the primary lockup as the default. Switch to stacked for square formats, icon for profiles and favicons.

PRIMARY LOCKUP

PRIMARY — REVERSED

STACKED LOCKUP

ICON MARK ONLY

Minimum sizes

The icon mark should never appear smaller than 24px. The primary lockup should never appear smaller than 120px wide.

64px

48px

32px

24px min

Clear space

Maintain a minimum clear space equal to the height of the accent line's container around all sides of the logo.

Color palette

The palette is intentionally restrained. Ink and Paper handle 90% of all applications. Mezzanine Blue is the single accent color.

Core palette

**Ink**

#0F0F0F

**Paper**

#FAFAF8

**Mezzanine Blue**

#2563EB

**Mid**

#6B6B68

Extended palette

**Blue Light**

#DBEAFE

**Blue Deep**

#1E40AF

**Warm Gray**

#E8E7E3

**Stone**

#D4D4D0

The accent blue is reserved.

Use it only for the mezzanine line in the logo, primary CTAs, or data highlights. Never fill large areas with it.

Typography

Two typefaces. A serif display for editorial headlines. A clean sans-serif for everything else — body, UI, captions, metadata.

DISPLAY	The view from above
HEADING	Strategy lives between brand and audience
BODY	We build social strategies from the mezzanine level — high enough to see the full picture, close enough to feel the pulse of the room.
SMALL	Social Strategy · Content · Community · Paid Media

Type scale

Role	Family	Weight	Size	Line-height
Display	DM Serif Display	400	36–48px	1.15
Heading	Inter	500	20–28px	1.3
Body	Inter	400	15–16px	1.65
Small	Inter	400	12–13px	1.5
Label	Inter	500	11–12px	1.4

Logo usage rules

The logo's strength is its simplicity. These rules protect that.

**DO**

Use the logo with generous white space around it

**DON'T**

Change logo colors independently

**DO**

Use reversed version on dark backgrounds

**DON'T**

Substitute the wordmark typeface

**DO**

Use icon alone for social profile pictures

**DON'T**

Rotate, skew, or distort the logo in any way

Brand voice

The Mezzanine speaks with the confidence of someone who's already done the work. Direct, strategic, and culturally fluent.

Confident, not arrogant

"We know what works because we've tested it, broken it, and rebuilt it."

Not hype-driven

"We're the #1 most innovative disruptive game-changing agency in the space!!!"

Sharp, not cold

"Your engagement is flat because your content talks at people, not with them."

Not vague

"We leverage synergies to drive holistic engagement across the digital ecosystem."

Culturally aware

"The trend peaked Tuesday. Here's what's replacing it and why it matters for you."

Not performative

"We're SO obsessed with this viral moment omg slay!!!"

Writing rule of thumb:

If it could appear on any agency's website and still make sense, it's too generic.

Social applications

Consistency across platforms is what separates a brand from a profile.

Instagram profile

LinkedIn banner

Email signature

Story highlight covers

Text only, not icons. A single word on a dark circle is cleaner at this size.

Asset checklist

Ensure the following files exist before going live. Every format should be exported from a single master vector file to guarantee consistency.

Asset	Format	Use
Primary lockup	.svg, .png @2x	Website, decks, documents
Primary lockup (reversed)	.svg, .png @2x	Dark backgrounds
Stacked lockup	.svg, .png @2x	Square placements
Icon mark	.svg, .png @2x, .ico	Favicons, profile pics
Icon mark (reversed)	.svg, .png @2x	Dark social profiles
Social templates	.fig, .psd	Instagram, LinkedIn, X

A note on the logo mark:

This guideline is built around an SVG wireframe concept. Once the final logo is generated or rebuilt by a designer as a proper vector, swap in those assets. The rules and system around it stay the same.
